

International Workshop on Biophysics and Soft Matter

26-28 May 2023

LT-17, Yeung Building, City University of Hong Kong

This workshop is organized and sponsored by the Department of Physics and Institute for Advanced Study (IAS) of City University of Hong Kong. In this workshop, we will bring together active researchers in various areas of biophysics and soft matter, including but not limited to the structures and interactions of DNA, proteins, and other biomolecules, polymer physics, rheology, colloids, active matter, self-assembly/organization, Monte Carlo simulation, molecular dynamics simulation, and single-molecule experiments. Latest research findings and future research directions will be presented and discussed.
